

Fusiain Cream

(Fusidic Acid 2%) **15 Gram**

فیوسی ایم کریم
(فیوسیڈک ایسڈ ۲ فیصد)

COMPOSITION

Each gm contains: Fusidic acid 20mg.

(BP Specifications)

PROPERTIES

Fusiain is an antibiotic with powerful antibacterial activity against a number of gram-positive organisms. Staphylococci, including the strains resistant to penicilin or to other antibiotics, are particularly susceptible to Fusiain.

Based on pronounced antibacterial activity against the majority of organisms responsible for skin infections, Fusiain also possesses unique ability for penetration to the focus of infection, even when applied to intact skin

INDICATIONS

Fusiain cream is indicated for treatment of skin infections caused by Staphylococci, Streptococci, Propionibacterium acne, Corynebacterium, Minutissimum, and other Fusiain-sensitive organisms. The most important indications being:

Impetigo	Carbuncles
Infected Wounds	Hidradenitis
Folliculitis	Boils
Paronychia	Sycosis Barbae
Erythrasma	Acne Vulgaris

Fusiain Cream is an invisible, non-staining preparation, which is cosmetically acceptable for treatment of face and scalp infections.

APPLICATION

Fusiain Cream is applied to the affected area 2-3 time daily, generally for a period of 7 days, except for acne where therapy should be extended for a longer period according to the nature of the disease.

SIDE-EFFECTS

Fusiain Cream is remarkably well tolerated, and there is an extremely low frequency of hypersensitivity reactions.

PACK SIZE:

15gm tube.

Precautions:
