

# Fusone Cream

(Fluticasone Propionate) 0.05% w/w

فیوسون کریم  
(فلوسیکاسون پروپونیت)

## Composition:

Each g contains

Fluticasone Propionate ..... 0.05%w/w.

## Description:

Fusone contains a medicine called fluticasone propionate. It belongs to a group of medicines called steroids. It helps to reduce swelling and irritation.

Fusone is used to help reduce the redness and itchiness of certain skin problems.

For adults these skin problems include eczema, psoriasis, dermatitis, insect bites or 'prickly heat.

For infants and children it is used for dermatitis that has not responded to milder steroid creams or ointments, following doctors advice.

## Warnings and precautions

Talk to your doctor or pharmacist before using Fusone if:

You have previously had an allergic reaction with another steroid.

You are applying the cream under an airtight dressing, including a child's nappy. These dressings make it easier for the active ingredient to pass through the skin. It is possible to accidentally end up using too much cream.

You are applying the cream on broken or damaged skin or within skin folds.

You have psoriasis, your doctor will want to see you more often.

You are using for a chronic leg ulcer as you may be at increased risk of local reaction or infection.

You are applying near eyes or on eyelids, as cataracts or glaucoma may result if the cream repeatedly enters the eye.

You have an infection of the skin as this will need to be treated.

You are applying to thin skin such as the face, as Fusone may cause skin thinning.

If you are not sure if the above apply to you, talk to your doctor or pharmacist before using this medicine.

Contact your doctor if you experience blurred vision or other visual disturbances.

## Presentation:

Pack 5g cream.

## Storage:

Store at room temperature.
