

# MINOAIM

100mg  
Tablets

مینو ایم ۱۰۰ ملی گرام  
مینوسائیکلین یو ایس پی

## Composition:

Each tablet contains: Minocycline (HCl) 100mg.

Product Specs. USP

Indications: Minoaim is indicated for the treatment of infections by strains-of micro organisms susceptible to minocycline, particularly indicated for the treatment of moderate or severe acne.

Contraindications: Hypersensitivity to tetracycline, renal and liver failure.

**Side effects:** As a result of the nearly complete absorption of Minocycline. the anterior digestive tract side effects, particularly diarrhoea, vomiting and abdominal pain may occasionally occur.

## Dosage:

Adult: 200 mg as an initial dose, followed by 100mg every 12 hours.

Children over 8 years old: 4 mg/kg as an initial dose, followed by 2 mg/kg every 12 hours.

Acne treatment: 100 mg a day.

For patients with renal or liver failure, dosage should be reduced by decreasing the doses and/or increasing the intervals between them.

The use of Minocycline during pregnancy may cause fetus injury. The risk to the fetus should be evaluated. Tetracyclines are excreted in mother milk, decision whether to continue the treatment should be made, taking the. treatment importance to the mother into consideration. The use of tetracycline drugs is not recommended during teeth development as they

May cause permanent spots in teeth. Overdose: In case of overdose, discontinue the drug, treat the symptoms and take the supportive measures.
